SEPTEMBER 4, 2024

AÉRO Collection

B.R.M Chronographes takes to new heights

September often signifies the end of vacation, but for those passionate about precision mechanics, it's not yet time to land.

B.R.M Chronographes, a French watchmaking brand renowned for its artisanal craftsmanship and sporty DNA, invites you to extend the journey with its **new collection of watches inspired by the world of aviation : AÉRO.**

This independent watchmaking brand, which has previously partnered with the aviation event « Le Temps des Hélices », welcomes you on an exhilarating exploration into the heights of this new collection.

" The world of aviation, with its precision, ingenuity, and boldness, resonates with the values of our brand.

Each piece in this AERO collection is a tribute to all aviation and watchmaking enthusiasts. "

Bernard Richards,
C.E.O of B.R.M Chronographes

When Elegance Meets the World of Aviation

The **AÉRO** collection, a true instrument of time measurement, has been designed for air adventurers and aviation enthusiasts seeking a watch that reflects their passion. It includes three automatic pilot watches (**AÉRO-2** ***ELEVATION***, **AÉRO-6** ***TAILPLANE***, and **AÉRO-8** ***CHRONOHORIZON***) with a monochrome spirit. The omnipresent black is featured on nearly all components, from the case to the dial, as well as the strap, buckle, and even the lugs on two of the three models offered. The crown is enhanced with white lacquer baked in a kiln, adding a touch of refinement to this elegant design.

A Dashboard on Your Wrist

The automatic movement offers exceptional precision with 28,800 vibrations per hour and 25 jewels. The full black dial has been specially developed so that a seasoned pilot's eye can recognize the codes of the aviation world. The discreet minute track at 3 o'clock and 9 o'clock indexes recall the turn indicator or gyroscope. Reflective yellow bands, reminiscent of the ground markings that guide aircrews, lead the eye to the date display. Finally, cockpit-style hands enhanced with Superluminova® complete this perfect timepiece.

A Premium Strap

The smooth and shiny leather strap, reminiscent of aviator jackets, adds a touch of elegance to this simple yet sporty watch. It comes in two color options, black or brown, with a simple hand-stitched white seam. The overall feel is very pleasant to the touch, providing excellent comfort when worn on the wrist.

AÉRO COLLECTION
Visual and Technical Differences Between the Models

AÉRO-6 *TAILPLANE*

The **AÉRO-6** ***TAILPLANE*** has a 44mm case. Fans of the brand will recognize on this model the «Shock Absorbers» (SA) springs, an innovative technology developed within the French manufacture, which protects the movement by ensuring effective absorption against shocks and vibrations that the watch may encounter.

MOVEMENT
Automatic movement
25 jewels

FULL DIAL
Black dial, white numbers with yellow reflective strip
Indexes at 3 o'clock and et 9 o'clock

SPRINGS "SHOCK ABSORBERS"
Protect the movement against shocks and vibrations

About B.R.M Chronographes

B.R.M Chronographes, a French watchmaking brand, was founded in 2003, driven by the commitment and passion for precision mechanics of its founder Bernard Richards. Completely independent, this manufacture, protected in a peaceful haven in Vexin, produces only unique pieces, entirely hand-finished and customizable thanks to an online configurator. Using cutting-edge materials such as titanium, carbon, Fortal® HR, or Makrolon®, the brand offers its clients, who are passionate about motorsports, exceptional products crafted with artisanal expertise. In 2021, the French manufacture was awarded the «Entreprise du Patrimoine Vivant» (Living Heritage Company) by the French government, recognizing the excellence of the brand's artisanal craftsmanship as well as its technological and environmental commitment on a daily basis.
